Re: Bear Lake Bid Addendum

PLM will provide herbicide application services for Bear Lake for the 2019 season, under the management of Restorative Lake Services. See unit costs provided in RLS bid document.

Management program goals for 2019: Aggressively controlling exotic and invasive species throughout Bear Lake.

Products to be applied: Restrictive products such as Diquat, Triclopyr, Aquathol K, Hydrothol 191, and nonrestrictive products such as chelated copper products, shade and any new products approved for use through the MDEQ.

Proposed Timeline

Winter 2018: Apply for DEQ Permit

Spring 2019: Pre Treatment Notification

Summer 2019: Herbicide/algaecide applications

Contract Period:

Multiple Year Treatment Program: As an incentive to establish a multiple year agreement we will treat your lake or pond at the same price structure as 2019 for 2020! The remaining one year (2021) will have cost increases of (2%) two percent per year or less. If total chemical cost increases 10% from the previous year a new agreement will have to be mutually acceptable. If during the life of the contract the MDEQ or other regulatory agencies significantly change the approved treatment procedures, either party may terminate this agreement upon giving ninety (90) days advance written notice thereof.

One Year Treatment Program: Pricing is based on the type and the amount of vegetation or algae present at the time of treatment, as well as, the products applied. Unlike the multiple year program, an agreeable price structure is not contracted into a one-year program. Therefore, an increase in the cost of products, labor, or changes made by the MDEQ or other regulatory agencies may have a drastic effect on the pricing for following years.

Permit Fee: PLM Lake & Land Management Corp. is responsible for completing and submitting aquatic nuisance permit applications. PLM Lake & Land Management Corp. will send an invoice or statement for the yearly MDEQ permit application fee. It is your responsibility to send a check made out to the "State of Michigan" to our office. We must include this check with the MDEQ permit application.

Posting of Treatment Areas: Posting of shoreline treatment areas is the responsibility of PLM Lake & Land Management Corp. and will be conducted according to MDEQ regulations. Due to MDEQ guideline changes and specific residential concerns, posting fees may apply. Signs will be attached to thick barked trees, posts or other suitable fixtures already on site. If homeowners wish to have signs posted in designated areas or on specific fixtures they must notify PLM Lake & Land Management Corp., providing lake address, location of property, and where the signs are to be posted. Pictures are the most informative way to relay this information. Notification of alternate posting must be made at least 14 days prior to treatment and additional fees may apply. The removal of posting signs after the restrictions have expired is the responsibility of the homeowner.

Notification of Treatments: PLM will notify each resident within 100 feet of the treatment area at least seven days in advance, but no more than forty-five days prior to the first treatment date, that products will be applied to the lake (with a

provided list of addresses from the lake board). This notification requirement must be administered to each and every property owner within 100 feet of any treatment area. PLM Lake & Land Management Corp. will provide a tentative treatment schedule and the Notice of proposed products to be used during the spring of each year. We will also notify resident within 100 feet of the treatment areas on the day of treatment.

Non-Target Species: Please be aware that we only control weeds and algae present at time of treatment. Emergent vegetation (cattails, bulrush, purple loosestrife), lily pads, eel grass and sago pondweed require separate programs for control and are not addressed unless specifically mentioned in the management program. We have no control over future weed or algae growth based on the current chemicals registered for aquatic use in Michigan.

Invoicing and Payments: PLM Lake & Land Management Corp. will submit an invoice following treatment that will include the following information; lake and/or pond(s) treated, date of treatment and type of treatment or acres treated. Monies will be due net thirty (30) days after each treatment. Interest of 1.25% will be added to your bill for each additional sixty (60) days that payment is not received. If changes, amendments or modifications need to be made to these payment terms, please contact PLM to discuss.

Liability Issues:

RLS, and Bear Lake Improvement Board will be issued as additionally insured under PLM's insurance policy.

We are responsible for workman's compensation and liability insurance for the duration of the contracted period.

PLM Lake & Land Management Corp. is not responsible for fish loss due to low oxygen levels caused during warm water conditions.

Please sign and return to PLM by March 1, 2019.

For further clarification or modifications, please contact.
